## **RESPONSE TO AMENDMENT**

1. Claims 1-64 are pending in the application, claims 19-26, 32-60 and 64 have been withdrawn from consideration.
2. Amendments to the claims, filed on June 21, 2005, have been entered in the above-identified application.

### ***WITHDRAWN REJECTIONS***

3. The 35 U.S.C. §112, §102 and §103 rejections made of record in the office action mailed March 21, 2005, pages 3-7, paragraphs #6-#8 have been withdrawn due to Applicant's amendment in amendment filed June 21, 2005.

### ***REJECTIONS***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 102***

5. Claims 1-4, 6-10, 15, 17, 18, 27-31 and 61-63 are rejected under 35 U.S.C. 102(e) as being anticipated by Huang et al. (U.S. Patent No. 6,352,758).

Regarding Applicant's claim 1, Huang discloses a substrate comprising a relief (*grooved layer, col. 4, lines 24-25 and figures 1-3*), wherein the relief consists of a low surface level and a high surface level (*figures 1-3*). The low surface level has a height not less than 1/10 of the

Art Unit: 1772

dimensions of a plurality of motifs forming the high surface level, since the references discloses in figure 3 that the height of the motifs is 5  $\mu\text{m}$  and the width of the projection is 4  $\mu\text{m}$  and the spacing between motifs is 4  $\mu\text{m}$ , also see col. 8, lines 49-62. The dimensions are in the region of a micrometer, the height ranges between 0.1 and 10 micrometers (*col. 8, line 52 and figure 3*) and the high surface level represents 1 to 65% of a surface of the substrate (*59% based on figure 3*).

Regarding Applicant's claim 2, Huang discloses that the substrate is hydrophobic/oleophobic and further comprises an agent of a silicone, such as  $\text{SiO}_2$  (*col. 5, line 10*).

Regarding Applicant's claim 3, Huang discloses that the substrate is hydrophilic/oleophilic (*col. 2, line 65*).

Regarding Applicant's claims 4 and 61, Huang discloses that the height ranges between 0.1 and 2 micrometers and between 1 and 10 micrometers (*col. 8, line 52*).

Regarding Applicant's claim 6, Huang discloses that the geometry of the relief displays a periodicity (*figure 1*).

Regarding Applicant's claim 7, Huang discloses that the low surface level and the high surface level are connect to one another by means of at least one partition approximately perpendicular to a plane of the substrate (*figures 2 and 3*).

Regarding Applicant's claim 8, Huang discloses that the high surface level displays a continuity in at least one direction of a plane of the substrate (*figures 1-3*).

Regarding Applicant's claim 9, Huang discloses that the relief comprises a multiplicity of approximately identical parallelepipedal objects, the parallelepipedal objects parallel and uniformly spaced (*col. 9, lines 12-15 and figure 1*).

Regarding Applicant's claim 10, Huang discloses that the surface level does not display continuity in any direction of a plane of the substrate, since the reference discloses that the grooves can be irregularly shaped (*col. 9, line 1215*).

Regarding Applicant's claim 15, Huang discloses that the relief is based on at least one compound of at least one of the elements selected from the group consisting of Si, W Sb, Ti, Zr, Ta, V, Pb, Mg, Al, Mn, Co, Ni, Sn, Zn, In, a plastic and a plastic containing a filler, the compound optionally hardened by means of application of an energy source, or a thermoplastic, and wherein at least one underlying portion of the substrate is composed of a glass, a plastic or combination thereof (*col. 4, line 49 through col. 5, line 20*).

Regarding Applicant's claim 17, Huang discloses that the substrate has anti-reflecting properties, since the coating significantly reduces light intensity (*col. 9, lines 12-29*).

Regarding Applicant's claim 18, Huang discloses that the substrate has anti-staining properties (*col. 3, line 53*).

Regarding Applicant's claims 27 and 63, Huang's patterned article is deemed to be a glazing since it meets all the limitations of claim 1.

Regarding Applicant's claims 28-31, Huang discloses that the glazing can be added to a building or street furnishing; an air, marine or land transportation vehicle; screen, lamp or electronic display; furnishing or household electrical appliance (*col. 8, line 63 through col. 9, line 1 and col. 3, lines 44-54*).

Art Unit: 1772

Regarding Applicant's claim 62, Huang discloses that the furnishing or household electrical appliance is a refrigerator, a self, a shower partition, a refrigerator door, an oven door, a display case or a vitreous ceramic plate (*freezer door, col. 8, line 67*).

***Claim Rejections - 35 USC § 103***

6. Claims 5, 11-14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huang.

Huang is relied upon as described above.

Huang fails to disclose the claimed different relief shapes.

Since Applicant has not shown any criticality to the different relief shapes, it would have been an obvious matter of design choice to change the shape of the relief, since a modification would have involved a mere change in shape of the relief. A change in size or shape is generally recognized as being within the level of ordinary skill in the art, absent unexpected results. MPEP 2144.04 (I) and (IV).

***ANSWERS TO APPLICANT'S ARGUMENTS***

7. Applicant's arguments in the response filed June 21, 2005 regarding the 35 U.S.C. §112, §102 and §103 rejections of record have been considered but are moot since the rejections have been withdrawn.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1772

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
